

AKUA 7

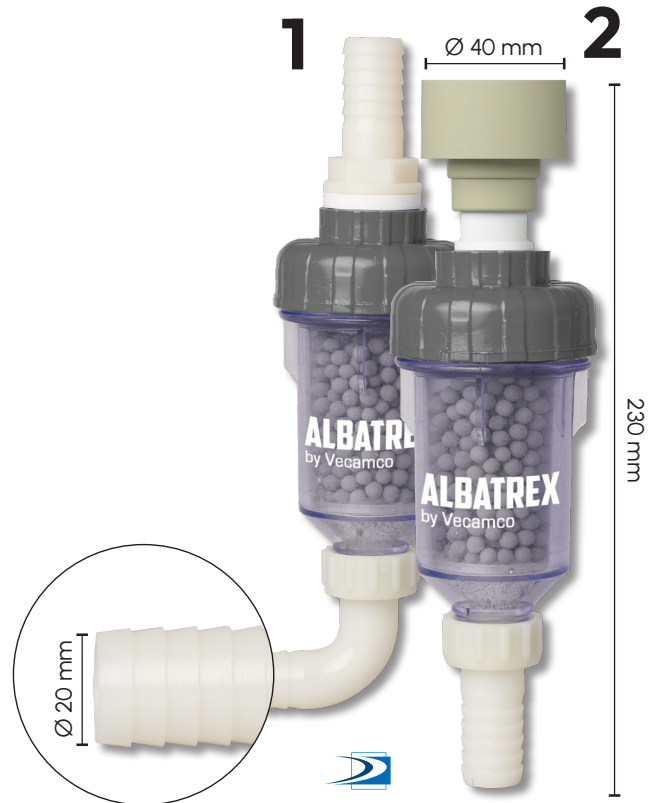

CONDENSATE NEUTRALIZER

AKUA7 helps to neutralize the acidity of the condensate produced, raising its pH to make it neutral or alkaline: it can be installed up to 35kw boilers.

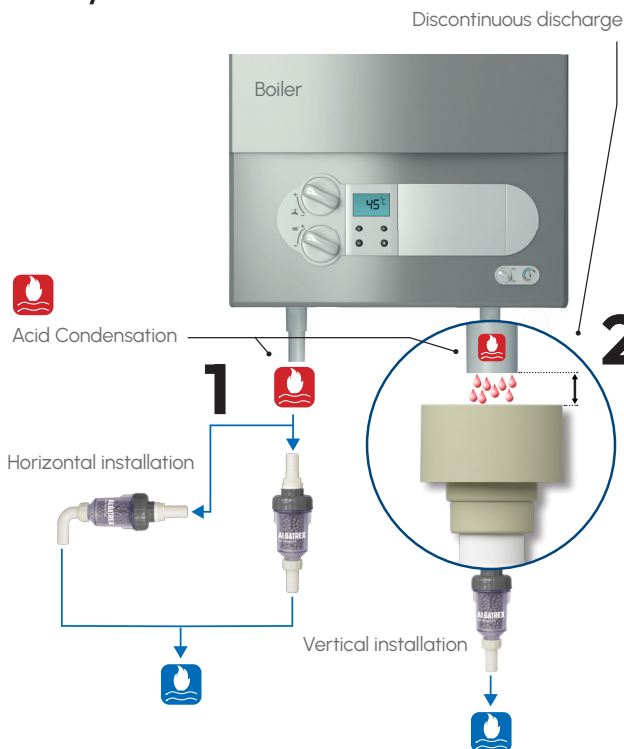

It is easy to install even in reduced areas both horizontally and vertically. Install in rooms protected from freezing, solvent vapors, combustible oils, detergents, all kinds of chemicals, UV rays and heat sources.

- Easy to install;
- Suitable for installation in small spaces;
- For condominium boilers of high power and single-family home boilers;
- Optional double connection for connection to the boiler.

COD.	INSTALLATION	Ø
1 AL-006	HORIZONTAL	20 mm - 20 mm
2 AL-005	VERTICAL	40 mm - 20 mm

Assembly scheme

TECHNICAL FEATURES:

- Use on boilers up to 35 kW power;
- Maximum flow rate of the fluid 3 L / h;
- Minimum water seal required 18 cm;
- Average length of neutralizing 8/12 months;
- Use specific neutralizing for acidic condensation;
- Max/Min operating temperature +4°C/+35°C.

REFILL

Specific neutralizing for acidic condensation refill
