

Quick-release control

Trolley system

Portable Lifter 5m

Engineered to minimise manual handling risks and enable safe raising and lowering of condensers, evaporators, duct work, air handling units and more. Built with a rugged construction to endure tough site conditions, complete with an innovative base featuring a small set of wheels to allow for easier transportation. The addition of a quick release cable brings easier operation and storage, with an optional remote control unit available to give even more practical possibilities.

- Load Capacity - 140kg @ 3m, 130kg @ 4m and 90kg above 4m.
- Folding Aluminium Platform - strong but low weight and hard wearing.
- Quick Release 5m Cable - makes storage and set up quicker and easier. No messy cables to store.
- Comes complete in a robust carry bag to protect and store safely.
- Robust aluminium telescoping mast and four folding support legs ensure safe and secure operation. Each leg is versatile, and able to be adjusted individually, so perfect for uneven ground.
- Built-in spirit level to ensure correct set up before lifting.
