

SP-MD BLACKOUT

COMPACT, ZIPPED SERVICE TECH TOOL

The SP-MD BLACKOUT is an all-black, compact, closed-top tool pouch featuring an optional cross-body sling strap. Similar in size to the popular SP-MC but with added depth front to back for increased stability and internal capacity. The main compartment is accessible via a flap that opens from the top down. The flap includes a zipped, two-way-access pocket that can be reached from either the outside or the inside of the bag. Also included are two all-black, external, removable side pouches—one functions as a tool pouch and the other as a drill holster. The removable tool pouch features two main pockets sized for a screwdriver or pliers, a pair of thru-pockets, pencil pockets, a stainless-steel tape measure clip, and an electrical tape strap. The removable drill holster can store any size drill up to 18v sized and includes four drill-bit pockets, a stainless-steel tape measure clip, and an optional lanyard that can be fastened across the drill for additional security. The lanyard can be removed or pushed down when not needed. These extremely valuable removable side pouches can also be clipped to your side while working on ladders or in tight spaces.
